

3. DFD & ER – Diagram.

Clinico Project: Core System Diagrams

This document provides a visual overview of the core data and process models for the Clinico project, designed for our project meeting.

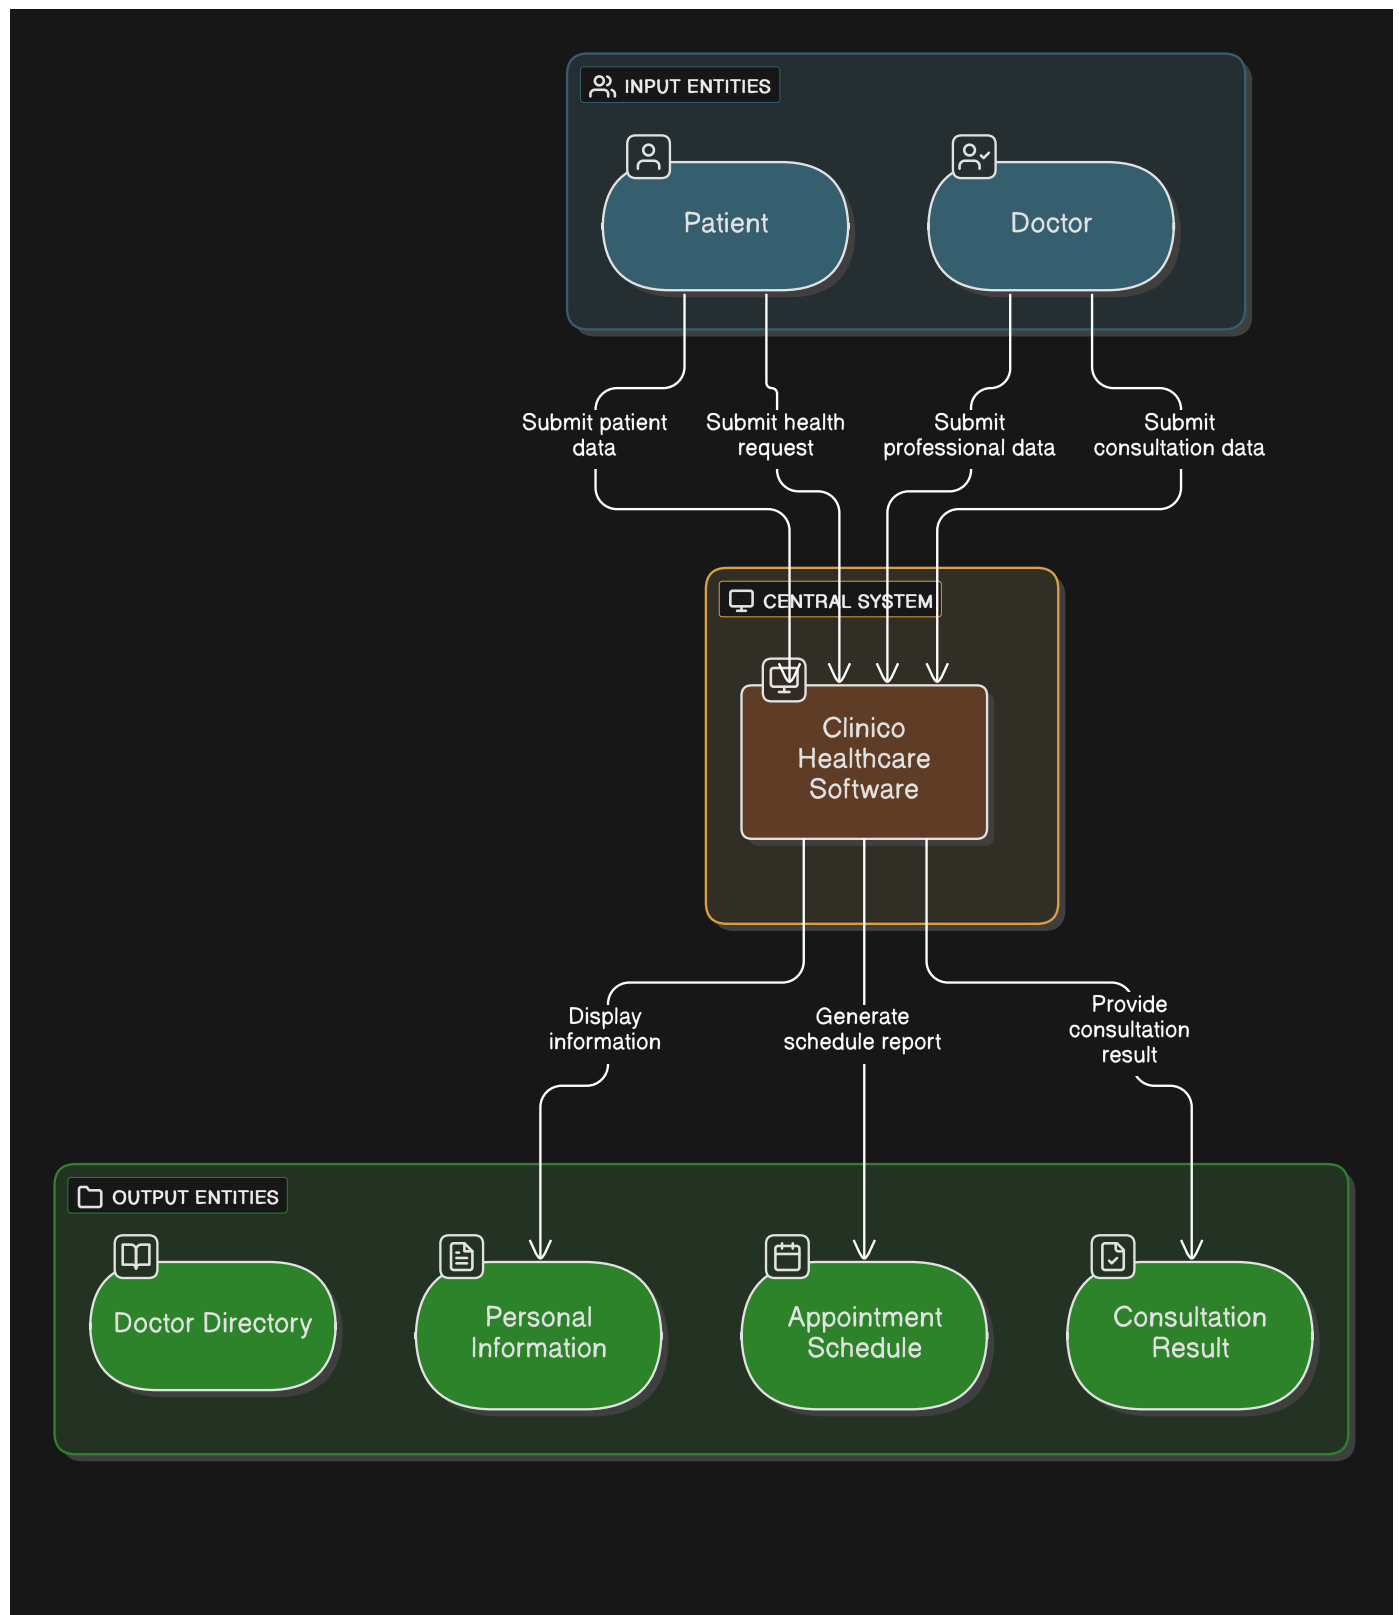

Entity-Relationship (ER) Diagram

This diagram illustrates the database schema, showing all data entities (like `Users`, `Appointments`, `Clinics`), their attributes, and the relationships between them.

Data Flow Diagram (DFD) - Level 0 (Context Diagram)

This diagram provides a high-level, "bird's-eye view" of the entire system. It shows the main external entities that interact with the Clinico platform and the primary data that flows between them.

Data Flow Diagram (DFD) - Level 1

This diagram is a more detailed breakdown of the Level 0 diagram. It shows the major internal processes within the Clinico system (like **AI Care Companion**, **Appointment & Scheduling**), the key data stores, and how data moves between them.
