

Assignment – 1

Submission Date: - 29 September 2025

- ❖ What is PHP? Explain its evolution and advantages over other scripting languages.
- ❖ Define variables and constants in PHP. How are they different from each other?
- ❖ Explain different data types available in PHP with suitable examples.
- ❖ What are operators in PHP? Explain any four types of operators with examples.
- ❖ What is a function in PHP? Differentiate between **call by value** and **call by reference** with examples.
- ❖ What is an array in PHP? Explain the difference between **indexed arrays** and **associative arrays**.
- ❖ Write short notes on looping through arrays using `each()` and `foreach()`.
- ❖ What are some useful library functions for array handling in PHP? Explain any five with examples.
- ❖ Explain how PHP handles HTML form data. How are `$_GET` and `$_POST` used?
- ❖ What are file upload forms in PHP? Explain the steps involved in creating a file upload form and redirecting it after submission.
